

LiquidPay.com

Blockchain-powered Spending

ACCEPTED BY 100M+ MERCHANTS WORLDWIDE

Benefits Of

Liquid Pay Cards

Instant Payments

The Liquid Pay card provides near instant transactions, eliminating traditional banking delays. This speed significantly enhances user experience and transaction efficiency.

Global Accessibility

The Liquid Pay card can be used globally without currency exchange, making it highly convenient for international travelers and users worldwide.

Lower Fees

Traditional credit cards incur high transaction and exchange fees. The Liquid Pay card significantly reduces these costs, making transactions more economical for users.

Security

Blockchain technology ensures Liquid Pay card transactions are encrypted and stored on a decentralized ledger, providing robust protection against fraud and hacking.

How It **WORKS**

01

Methods To Fund The Liquid Pay Card

Users can easily fund their Liquid Pay Card by transferring cryptocurrency from their digital wallets. You can also add money through bank transfers or other Payment Methods and Exchanges, making it flexible and convenient for everyone.

02

Using The Liquid Pay Card For Purchases

Liquid Pay Cards work just like traditional credit cards for Online and In-Store Purchases. Just swipe or enter your card details at checkout, and your transaction will be Processed smoothly and instantly.

03

Conversion Process

When you make a purchase with Liquid Pay, the Required amount of cryptocurrency is automatically converted to fiat currency at the current exchange rate. This ensures that merchants receive payment in their local currency. Plus, you can also withdraw cash from ATMs, just like with a regular card.

Liquid Pay Cards

Key Features And Advantages:

Liquid Pay Cards give you the best of both worlds—the benefits of cryptocurrencies with the convenience of credit cards. With Liquid Pay, you get instant payments, global access, lower fees, enhanced security, and the chance to earn rewards in cryptocurrency.

Liquid Pay Cards

Options & Privacy

Virtual and Physical Cards:

The Liquid Pay Card gives you the option of both virtual and physical cards. The virtual card is perfect for online transactions, while the physical card is great for in-store purchases.

Ensuring user privacy:

The Liquid Pay Card puts your privacy first. Your personal data is encrypted, and transactions can be done anonymously, providing you with a high level of privacy and security.

Seamless **TRANSACTIONS**

Self Guided Application Flow

Simply apply online, complete KYC in the app, and fund your account to get started.

Mobile App Integration

The Liquid Pay app provides real-time tracking, balance updates, rewards, and security control.

Monitoring And Tracking Expenses

The Liquid Pay app offers tools to monitor expenses, set budgets, get spending alerts, and view transaction history.

SECURITY

MEASURES

Fraud Prevention -

Liquid Pay employs advanced fraud detection systems to monitor transactions for suspicious activity.

Multi-Factor Authentication -

Multi-factor authentication (MFA) adds an extra layer of security by requiring users to verify their identity.

Customer Protection Policies -

Liquid Pay provides insurance coverage for unauthorized transactions and a robust dispute resolution process to protect users.

Market **POTENTIAL**

Current market trends and user adoption

The interest in cryptocurrency is growing rapidly, with increasing user adoption worldwide. More people are looking for ways to integrate crypto into their daily lives, making the market ripe for crypto credit cards.

Competitive Landscape

While there are several players in the crypto credit card market, Liquid Pay stands out due to its unique features, superior security, and user-friendly experience. We continually innovate to stay ahead of the competition.

Growth potential and predictions

The market for crypto credit cards is expected to grow exponentially in the coming years. Liquid Pay aims to capture a significant share of this market by expanding its offerings and enhancing user experience.

Demographic Breakdown Of

CRYPTOCURRENCY HOLDERS BY CONTINENT

North America:

- Population: ~370 million
- Percentage holding crypto: ~24%
- Crypto holders: ~88.8 million

South America:

- Population: ~430 million
- Percentage holding crypto: ~7%
- Crypto holders: ~30.1 million

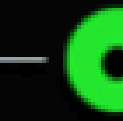

Africa:

- Population: ~1.3 billion
- Percentage holding crypto: ~7%
- Crypto holders: ~91 million

Europe:

- Population: ~750 million
- Percentage holding crypto: ~20%
- Crypto holders: ~150 million

Available on both IOS and Android, Liquid Pay brings seamless payments to your fingertips. Download now and experience the future of easy, secure transactions!

WHY THE RE-BRANDING?

Visa said in a statement that it has no relationship with 9Pay. VARA deviated from its stated policy of not commenting on individual companies to say that not only does it not work with Anwar, but it's also never heard of him. –*With Abeer Abu Omar, Ben Bartenstein and Zeke Faux*
